

CONTENTS

SECTION I	Foundation for the Use of Modalities	1
	CHAPTER 1	Foundations for Modalities as Procedural Interventions: Principles of Clinical Decision Making 3
	CHAPTER 2	Wound Healing and Pain 15
SECTION II	Technical Aspects of Therapeutic Modalities	41
	CHAPTER 3	Cold Therapy Modalities: Frozen Peas and More 43
	CHAPTER 4	Thermotherapy: Beyond Fake and Bake 61
	CHAPTER 5	Therapeutic Ultrasound and Phonophoresis 79
	CHAPTER 6	Electrotherapeutic Modalities: Electrotherapy and Iontophoresis 97
	CHAPTER 7	Hydrotherapy: The Use of Water as a Therapeutic Agent 123
	CHAPTER 8	Electromagnetic Radiation: Laser, Ultraviolet, and Diathermy 141
	CHAPTER 9	Mechanical Modalities: Traction and Intermittent Pneumatic Compression 165
SECTION III	Clinical Applications of Modalities for Impairments	183
	CHAPTER 10	Pain and Limited Motion 185
	CHAPTER 11	Tissue Healing and Edema 207
	CHAPTER 12	Muscle Weakness and Loss of Motor Performance 247
SECTION IV	Modality Interventions, Medical Conditions, and Emerging Applications	271
	CHAPTER 13	Considerations for Modalities in Selected Medical Conditions 273
	CHAPTER 14	Emerging Modalities: Is There Evidence? 285
	GLOSSARY	297
