PART I

INTRODUCTION, 1

CHAPTER 1

Historical Overview of Aquatic Rehabilitation, 3

Jean M. Irion

- Origin of the Use of Water, 3
- Era of Water Healing, 500 to 300 bc, 3
- Use of Water During the Roman Empire, 4
- Use of Water During the Decline of the Roman Empire and the Middle Ages, 4
- Use of Water During the Late 1600s and 1700s, 4
- Resurgence of Water for Healing in the 1800s, 5
- Development of Spas in Europe and England, 5
- Development of Spas and Hydrotherapy in the United States, 6
- History of Water Therapy in the Early to Mid-1900s in Europe, 8
- Arrival of Aquatic Rehabilitation in the United States, 9
- Aquatic Rehabilitation in Europe From the 1960s to Present, 10
- Decline of Aquatic Rehabilitation in the United States in the 1950s and 1960s, 10
- Resurgence of Aquatic Rehabilitation in the United States in the 1970s and 1980s, 11
- Present Status of Aquatic Rehabilitation in the United States and Europe, 11
- Summary, 13

CHAPTER 2

Aquatic Physics, 15

Bruce E. Becker

- Aquatic Physics, 15
- Summary, 23

CHAPTER 3

Physiologic Effects of Immersion at Rest, 25

Jolie Bookspan

- Cardiovascular Effects of Immersion, 25
- Renal Effects of Immersion, 30
- Summary, 33

CHAPTER 4

Physiologic Responses to Water Exercise, 39

Kirk J. Cureton

- Responses During Exercise, 39
- Adaptations to Training, 48
- Summary, 53

PART II**APPLICATIONS OF AQUATIC REHABILITATION, 57****CHAPTER 5****Aquatic Rehabilitation of Clients With Musculoskeletal Conditions of the Extremities, 59****Lori Thein, Christine McNamara**

- Goal-Oriented Rehabilitation, 59
- Impairment-Oriented Rehabilitation: Upper Extremity, 68
- Impairment-Oriented Rehabilitation: Lower Extremity, 74
- Summary, 82

CHAPTER 6**Aquatic Rehabilitation of Clients With Musculoskeletal Conditions of the Spine, 85****Christine McNamara, Lori Thein**

- Goal-Oriented Rehabilitation, 85
- Impairment-Oriented Rehabilitation, 94
- Case Studies, 101
- Summary, 102

CHAPTER 7**Aquatic Rehabilitation of the Neurologically Impaired Client, 105****David M. Morris**

- Rehabilitation of Clients With Neurologic Disorders, 106
- Guidelines for Aquatic Neurotreatment, 108
- Specific Aquatic Rehabilitation Approaches Used With Clients Recovering From Brain Injury, 112
- Common Problems Associated With Brain Injury, 115
- Community Aquatic Programs for Clients With Brain Injury, 120
- Summary, 124

CHAPTER 8**Aquatic Rehabilitation of Clients With Spinal Cord Injury, 127****Christine L. Giesecke**

- Neurologic and Functional Classification of Spinal Cord Injury, 128
- Medical Complications and Common Sequelae, 132
- Therapeutic Goals of Aquatic Exercise, 134
- Contraindications and Precautions, 136
- Designing a Therapeutic Aquatics Program, 136
- Methods of Transfer Into and Out of the Pool, 137
- Therapeutic Exercises in the Pool, 138
- Summary, 150

CHAPTER 9**Aquatic Rehabilitation of the Pediatric Client, 151****Jane L. Styer-Acevedo**

- Introduction, 151

- General Safety Considerations, 152
- Behavioral Considerations, 153
- Beginning Aquatic Therapy, 153
- Using Water to Address Problem Areas, 154
- Clinical Application of Safety Skills, 160
- Special Considerations, 163
- Considerations for Specific Diagnoses, 166
- Treatment Techniques, 167
- Treatment Goal and Treatment Plan, 170
- Summary, 170

CHAPTER 10

Aquatic Rehabilitation for the Obstetric and Gynecologic Client, 173

Judy Cirullo

- Maternal Anatomy and Kinesiology, 173
- Effect of Physical Changes on Mechanical Loading, 175
- Physiology of Pregnancy and Fetal Development, 175
- Physiologic and Anatomic Changes in the Postpartum Client, 176
- The Aquatic Environment and the Obstetric and Gynecologic Client, 176
- General Safety: Temperature and Equipment, 178
- Physical Examination, 178
- Testing and Recommendations for Diastasis Recti, 180
- The Importance of Integrating Land and Aquatic Treatment, 180
- Aquatic Applications, 180
- Swim Stroke Recommendations, 192
- Summary, 193

CHAPTER 11

Aquatic Rehabilitation of Clients With Rheumatic Disease, 195

Roxane McNeal

- Special Needs of This Client Population, 196
- Aquatic and Land Physical Therapy, 196
- Benefits of Aquatic Rehabilitation Specific to Clients With Rheumatic Disease, 197
- Conditions, 199
- Exercise Concepts Incorporated in Aquatic Therapy, 200
- Pool Facility Requirements, 201
- Client Selection for Aquatic Therapy, 202
- General Guidelines for Aquatic Therapy, 204

CHAPTER 12

Aquatic Rehabilitation of the Athlete, 211

Thomas Tierney

- Benefits of Aquatic Programming for the Athlete: The Principle of Unloading, 212
- History of Injuries in Athletes and Prevalence of Injuries in Sports, 212
- Therapeutic Intervention, 214
- Aquatic Approach to Vertebral Dysfunction in the Athlete, 217
- Aquatic Approach to Lower Extremity Injuries in the Athlete, 220
- Aquatic Approach to Upper Extremity Injury in the Athlete, 221
- Summary, 224

CHAPTER 13**Aquatic Rehabilitation of the Client With Cardiovascular Disease, 227*****Karen Congdon***

- Evolution of Cardiac Rehabilitation, 227
- Subjective Responses to Exercise in Water, 229
- Blood Pressure, 231
- Temperature and Rhythm Disturbances, 232
- Swimming, 233
- Water Exercise for a Cardiac-Based Population, 233
- Initial Session Protocol, 235
- Emergency Procedures for Cardiac Participants in Aquatic Programs, 236
- Summary, 238

CHAPTER 14**Swim Stroke Training and Modification for Rehabilitation, 243*****Emily Dunlap***

- General Issues, 243
- Swim Training Progression, 245
- Swim Training Equipment, 253
- Swim Strokes, 255
- Swim Stroke Progression: Typical Problems and Modifications Specific to Injury or Disability, 273
- When to Refer to a Community Swim Instructor, 282

PART III**PHILOSOPHIES OF AQUATIC REHABILITATION, 287****CHAPTER 15****Bad Ragaz Ring Method, 289*****Gwendolyn Garrett***

- Comparison of the Bad Ragaz Ring Method With Proprioceptive Neuromuscular Facilitation, 290
- Goals of Treatment, 290
- Technique, 290
- Client Setup, 291
- Treatment Guidelines, 292

CHAPTER 16**Halliwick Method, 305*****Jennifer Cunningham***

- The Halliwick Concept By James McMillan, MBE, 306
- The Basic Course, 309
- The Advanced Course, 324
- Summary, 331

CHAPTER 17

WATSU, 333

Harold Dull

- The Flows of WATSU, 334
- The Transition Flow, 334
- Expanding the Transition Flow, 348
- Worldwide Aquatic Bodywork Association, 352

PART IV

PRACTICE MANAGEMENT, 353

CHAPTER 18

Facility Design, 355

Marilou Moschetti

- Why Water?, 355
- Development Phase, 355
- Preplanning Phase, 356
- Postconstruction Phase, 358
- The "Ideal" Aquatic Wellness Center, 358
- Safety Considerations for the Pool, 363
- Cost Recovery Estimates and Potential Revenue for an Aquatic Center, 364
- Aquatic Therapy Facilities in Current Operation, 365
- Summary, 369
- Appendix 18-A: The Preplanning Budget, 370
- Appendix 18-B: Project Construction Checklist, 371
- Appendix 18-C: "Ideal" Aquatic Wellness Center, 372

CHAPTER 19

Risk Management, 375

Annie Clement

- Risk Management: A Solution, 376
- Law and Legal Theories: Practice, 376
- Law and Legal Theories: Management, 378
- Risk Management, 384
- Summary, 389

CHAPTER 20

Exercise Equipment in the Aquatic Environment, 391

Cheryl S. Fuller

- Equipment Principles and Benefits, 391
- Products Available, 393
- Choosing Equipment, 400
- Proper Care of Equipment, 401
- Liability, 402
- Summary: Future Equipment Needs, 402
