6 ed.
4j.3

Contents

Preface	vii
Chapter 1 Overview of the Cardiovascular System	1
Objectives / 1	
Homeostatic Role of the Cardiovascular System / 1	
The Basic Physics of Blood Flow / 5	
The Heart / 8	
The Vasculature / 12	
Blood / 15	
Foundation for Subsequent Chapters / 16	
Key Concepts / 17	
Study Questions / 17	
Suggested Readings / 18	
Chapter 2 Characteristics of Cardiac Muscle Cells	19
Objectives / 19	
Electrical Activity of Cardiac Muscle Cells / 20	
Mechanical Activity of the Heart / 33	
Relating Cardiac Muscle Cell Mechanics to Ventricular Function / 43	
Key Concepts / 44	
Study Questions / 44	
Suggested Readings / 45	
Chapter 3 The Heart Pump	47
Objectives / 47	
Cardiac Cycle / 48	
Determinants of Cardiac Output / 54	
Influences on Stroke Volume / 55	
Summary of Determinants of Cardiac Output / 59	
Cardiac Energetics / 62	
Measurement of Cardiac Function / 65	
Key Concepts / 68	
Study Questions / 69	
Suggested Readings / 70	
Chapter 4 The Electrocardiogram	71
Objectives / 71	
Basic Features of the Electrocardiogram / 71	
Cardiac Dipoles & Electrocardiographic Records / 74	
Mean Electrical Axis & Axis Deviations / 78	
The Standard 12-Lead Electrocardiogram / 79	
Key Concepts / 81	

Study Questions / 81	
Suggested Readings / 82	
Chapter 5 Cardiac Abnormalities	83
Objectives / 83	
Electrical Abnormalities & Arrhythmias / 83	
Valvular Abnormalities / 88	
Key Concepts / 90	
Study Questions / 91	
Suggested Readings / 91	
Chapter 6 The Peripheral Vascular System	93
Objectives / 93	
Cardiovascular Transport / 94	
Basic Vascular Function / 100	
Measurement of Arterial Pressure / 109	
Determinants of Arterial Pressure / 111	
Key Concepts / 113	
Study Questions / 114	
Suggested Readings / 115	
Chapter 7 Vascular Control	117
Objectives / 117	
Vascular Smooth Muscle / 118	
Control of Arteriolar Tone / 122	
Control of Venous Tone / 132	
Summary of Primary Vascular Control Mechanisms / 133	
Vascular Control in Specific Organs / 133	
Key Concepts / 143	
Study Questions / 143	
Suggested Readings / 144	
Chapter 8 Central Venous Pressure: An Indicator of Circulatory Hemodynamics	146
Objectives / 146	
Interaction of System Components / 146	
Central Venous Pressure: An Indicator of Circulatory Status / 149	
Influence of Central Venous Pressure on Venous Return / 150	
Influence of Peripheral Venous Pressure on Venous Return / 152	
Determination of Cardiac Output & Venous Return by Central Venous Pressure / 153	
Clinical Implications of Abnormal Central Venous Pressures / 158	
Key Concepts / 159	
Study Questions / 159	
Suggested Readings / 159	

Chapter 9 Regulation of Arterial Pressure	161
Objectives / 161	
Short-Term Regulation of Arterial Pressure / 162	
Long-Term Regulation of Arterial Pressure / 177	
Key Concepts / 182	
Study Questions / 183	
Suggested Readings / 183	
Chapter 10 Cardiovascular Responses to Physiological Stresses	185
Objectives / 185	
Effect of Respiratory Activity / 187	
Effect of Gravity / 189	
Effect of Exercise / 194	
Age-Dependent Cardiovascular Changes / 199	
Effect of Gender / 201	
Key Concepts / 202	
Study Questions / 203	
Suggested Readings / 203	
Chapter 11 Cardiovascular Function in Pathological Situations	205
Objectives / 205	
Circulatory Shock / 206	
Cardiac Disturbances / 210	
Hypertension / 217	
Key Concepts / 221	
Study Questions / 221	
Suggested Readings / 222	
Answers to Study Questions	223
Appendix A	237
Appendix B	238
Appendix C	239
Appendix D	241
Index	245
