

CONTENTS

CHAPTER 1

REGULATION: PEPTIDES OF THE GASTROINTESTINAL TRACT1

LEONARD R. JOHNSON

- General Characteristics 1
- Discovery 2
- Chemistry 3
- Distribution and Release 5
- Actions and Interactions 6
- Candidate Hormones 8
- Neurocrines 9
- Paracrines 10
- Clinical Applications 10
- Clinical Tests 11
- Summary 11
- Key Words and Concepts 11

CHAPTER 2

REGULATION: NERVES AND SMOOTH MUSCLE13

NORMAN W. WEISBRODT

- Anatomy of the Autonomic Nervous System 13

- Neurohumoral Regulation of Gastrointestinal Function 15
- Anatomy of the Smooth Muscle Cell 16
- Smooth Muscle Contraction 17
- Summary 20
- Key Words and Concepts 21

CHAPTER 3

SWALLOWING23

NORMAN W. WEISBRODT

- Esophageal Peristalsis 23
- Receptive Relaxation of the Stomach 28
- Clinical Applications 28
- Clinical Tests 29
- Summary 29
- Key Words and Concepts 30

CHAPTER 4

GASTRIC EMPTYING31

NORMAN W. WEISBRODT

- Anatomic Considerations 31
- Contractions of the Oral Region of the Stomach 32
- Contractions of the Caudal Region of the Stomach 32

- Contractions of the Gastroduodenal Junction 34
- Contractions of the Proximal Duodenum 34
- Regulation of Gastric Emptying 35
- Clinical Applications 37
- Clinical Tests 38
- Summary 38
- Key Words and Concepts 38

CHAPTER 5

MOTILITY OF THE SMALL INTESTINE 41

NORMAN W. WEISBRODT

- Anatomic Considerations 41
- Types of Contractions 41
- Patterns of Contractions 42
- Clinical Applications 46
- Clinical Tests 46
- Summary 47
- Key Words and Concepts 47

CHAPTER 6

MOTILITY OF THE LARGE INTESTINE 49

NORMAN W. WEISBRODT

- Anatomic Considerations 49
- Contractions of the Cecum and Ascending Colon 50
- Contractions of the Descending and Sigmoid Colon 51
- Motility of the Rectum and Anal Canal 52
- Control of Motility 52
- Clinical Significance 53

- Clinical Tests 54
- Summary 54
- Key Words and Concepts 55

CHAPTER 7

SALIVARY SECRETION 57

LEONARD R. JOHNSON

- Functions of Saliva 57
- Anatomy and Innervation of the Salivary Glands 58
- Composition of Saliva 59
 - Inorganic Composition* 59
 - Organic Composition* 63
- Regulation of Salivary Secretion 63
- Summary 65
- Key Words and Concepts 65

CHAPTER 8

GASTRIC SECRETION 67

LEONARD R. JOHNSON

- Functional Anatomy 67
- Secretion of Acid 70
- Origin of the Electrical Potential Difference 71
- Electrolytes of Gastric Juice 71
- Stimulants of Acid Secretion 72
 - Role of Histamine in Acid Secretion* 72
- Stimulation of Acid Secretion 74
 - Cephalic Phase* 74
 - Gastric Phase* 74
 - Release of Gastrin* 76
 - Intestinal Phase* 76
- Inhibition of Acid Secretion 77
- Pepsin 78

| | |
|------------------------|----|
| Mucus | 79 |
| Intrinsic Factor | 79 |
| Growth of the Mucosa | 80 |
| Pathophysiology | 80 |
| Summary | 83 |
| Key Words and Concepts | 83 |

CHAPTER 9

PANCREATIC SECRETION 85

LEONARD R. JOHNSON

| | |
|---|----|
| Functional Anatomy | 85 |
| Mechanisms of Fluid and Electrolyte Secretion | 85 |
| Mechanisms of Enzyme Secretion | 88 |
| Regulation of Secretion | 89 |
| <i>Cephalic Phase</i> | 89 |
| <i>Gastric Phase</i> | 89 |
| <i>Intestinal Phase</i> | 89 |
| Cellular Basis for Potentiation | 92 |
| Response to a Meal | 93 |
| Clinical Applications | 94 |
| Summary | 94 |
| Key Words and Concepts | 95 |

CHAPTER 10

BILE SECRETION AND GALLBLADDER FUNCTION . . . 97

NORMAN W. WEISBRODT

| | |
|--|-----|
| Bile Formation | 97 |
| <i>Constituents of Bile</i> | 97 |
| Bile Secretion | 99 |
| Bile Transport to and Storage in the Gallbladder | 102 |

| | |
|--|-----|
| Expulsion of Bile and Transport to the Intestine | 104 |
| Clinical Applications | 105 |
| Clinical Tests | 105 |
| Summary | 106 |
| Key Words and Concepts | 106 |

CHAPTER 11

DIGESTION AND ABSORPTION 107

LEONARD R. JOHNSON

| | |
|---|-----|
| Structural-Functional Associations | 107 |
| Digestion | 107 |
| Absorption | 108 |
| <i>Mucosal Membrane</i> | 108 |
| <i>Transport Processes</i> | 108 |
| Adaptation of Digestive and Absorptive Processes | 109 |
| Carbohydrate Assimilation | 109 |
| <i>Principal Dietary Forms</i> | 109 |
| <i>Digestion</i> | 110 |
| <i>Absorption of Digestion Products</i> | 110 |
| <i>Regulation of Absorption</i> | 111 |
| <i>Abnormalities in Carbohydrate Assimilation</i> | 112 |
| Protein Assimilation | 114 |
| <i>Digestion</i> | 114 |
| <i>Development of Pancreatitis</i> | 115 |
| <i>Absorption of Digestion Products</i> | 115 |
| <i>Abnormalities in Protein Assimilation</i> | 116 |
| Lipid Assimilation | 118 |
| <i>Digestion</i> | 118 |
| <i>Absorption of Lipolytic Products</i> | 119 |
| <i>Intracellular Events</i> | 120 |
| <i>Abnormalities in Lipid Assimilation</i> | 122 |

| | |
|------------------------|-----|
| Vitamins | 123 |
| Summary | 124 |
| Key Words and Concepts | 125 |

CHAPTER 12

FLUID AND ELECTROLYTE ABSORPTION127

LEONARD R. JOHNSON

| | |
|--|-----|
| Bidirectional Fluid Flux | 127 |
| Ionic Content of Luminal Fluid | 127 |
| Transport Routes and Processes | 128 |
| <i>Na⁺-Cl⁻ Transport</i> | 129 |
| <i>K⁺ Transport</i> | 131 |
| Mechanism for Water Absorption and Secretion | 131 |
| Intestinal Secretion | 132 |
| Ca ⁺⁺ Absorption | 133 |
| Iron Absorption | 134 |
| Summary | 135 |
| Key Words and Concepts | 135 |

CHAPTER 13

REGULATION OF FOOD INTAKE137

LEONARD R. JOHNSON

| | |
|--------------------|-----|
| Appetite Control | 137 |
| The Nervous System | 138 |

| | |
|---|-----|
| <i>Hypothalamus</i> | 138 |
| <i>Enteric Nervous System and Vagus Nerve</i> | 138 |
| The Endocrine System | 139 |
| <i>Insulin</i> | 139 |
| <i>Leptin</i> | 139 |
| The Gastrointestinal System | 140 |
| <i>Cholecystokinin</i> | 140 |
| <i>Peptide YY</i> | 140 |
| <i>Ghrelin</i> | 140 |
| <i>Additional Peptides</i> | 141 |
| Treatment of Obesity | 141 |
| Summary | 142 |
| Key Words and Concepts | 142 |

APPENDIX: REVIEW EXAMINATION . . .143

ANSWERS151
