General Introduction	xv
Objectives	1
Introduction	3

PART I Fundamentals and Diagnostic Approaches 5

1 Basic Anatomy	7
The Vitreous	7
Neurosensory Retina	8
Retinal Pigment Epithelium	13
Bruch's Membrane	16
Choroid	16
Sclera	17
2 Diagnostic Approach to Retinal Disease	19
Techniques of Examination	19
Retinal Angiography Techniques	20
Fluorescein Angiography	20
Indocyanine Green Angiography	25
Other Imaging Techniques	27
Optical Coherence Tomography	27
Scanning Laser Ophthalmoscopy	29
Retinal Thickness Analyzer	30
Fundus Autofluorescence	30
Conditions Commonly Diagnosed Using Imaging Technology	31
3 Retinal Physiology and Psychophysics	33
Electroretinogram	33
Recording and Interpreting the Response	33
Specialized Types of ERG	37
Applications and Cautions	40
Electro-oculogram and RPE Responses	42
Electro-oculogram	42
Other RPE Tests	44
Cortical Evoked Potentials	45
Visually Evoked Potentials	45
Electrically Evoked Potentials	47

Psychophysical Testing	47
Dark Adaptation	47
Color Vision	48
Contrast Sensitivity	51

PART II Disorders of the Retina and Vitreous 53

4 Acquired Diseases Affecting the Macula 55

Central Serous Chorioretinopathy.	55
Fluorescein Angiography of CSC	56
Other Imaging Modalities for CSC.	56
Differential Diagnosis	58
Natural Course and Management	58
Optic Pit Maculopathy	59
Age-Related Macular Degeneration	60
Genetics and AMD	62
Nonneovascular Abnormalities in AMD	62
Neovascular AMD	71
Other Causes of Choroidal Neovascularization	90
Ocular Histoplasmosis Syndrome	90
Idiopathic CNV.	92
Angioid Streaks	93
Pathologic Myopia	95
Miscellaneous Causes of CNV	97
Vitreoretinal Interface Abnormalities	97
Epiretinal Membranes	97
Vitreomacular Traction Syndrome.	100
Idiopathic Macular Holes.	101
Valsalva Retinopathy	104
Purtscher Retinopathy and Purtscher-like Retinopathy.	105
Terson Syndrome	106

5 Retinal Vascular Disease 107

Systemic Arterial Hypertension.	107
Hypertensive Retinopathy	107
Hypertensive Choroidopathy	108
Hypertensive Optic Neuropathy.	109
Diabetic Retinopathy	109
Terminology	110
Epidemiology.	110
Pathogenesis	112
Conditions Associated With Potential Visual Loss From Diabetic Retinopathy	112
Classification of Diabetic Retinopathy and Disease Progression	112
Diabetic Macular Edema	113
Diabetic Macular Ischemia	119
Current Indications for Pars Plana Vitrectomy in Patients With Diabetes	129

Photocoagulation for Diabetic Retinopathy	130
Cataract Surgery in Patients With Diabetes	131
Suggested Timetables for Detailed Ophthalmic Examination of Patients With Diabetes	131
Sickle Cell Retinopathy	132
Nonproliferative Sickle Cell Retinopathy	133
Proliferative Sickle Cell Retinopathy	134
Other Ocular Abnormalities in Sickle Cell Hemoglobinopathies	135
Management	135
Peripheral Retinal Neovascularization	137
Retinopathy of Prematurity	137
Pathogenesis and Staging.	139
Treatment	145
Venous Occlusive Disease	150
Branch Retinal Vein Occlusion	150
Central Retinal Vein Occlusion	154
Retinopathy of Carotid Occlusive Disease	159
Arterial Occlusive Disease	159
Precapillary Retinal Arteriole Obstruction	159
Branch Retinal Artery Occlusion	160
Central Retinal Artery Occlusion	162
Ocular Ischemic Syndrome	164
Vasculitis	166
Cystoid Macular Edema	167
Coats Disease	170
Parafoveal (Juxtafoveal) Retinal Telangiectasia	171
Arterial Macroaneurysms	173
Phakomatoses	174
Retinal Angiomas	174
Congenital Retinal Arteriovenous Malformations	177
Retinal Cavemous Hemangioma	177
Radiation Retinopathy.	178
6 Choroidal Disease	181
Bilateral Diffuse Uveal Melanocytic Proliferation	181
Choroidal Perfusion Abnormalities	182
Choroidal Hemangioma	186
Uveal Effusion Syndrome	187
7 Focal and Diffuse Choroidal and Retinal Inflammation	189
Noninfectious Retinal and Choroidal Inflammation	189
White Dot Syndromes	189
Inflammatory Vasculitis	197
Intermediate Uveitis	199
Panuveitis	200
Infiltrative Uveitis	202

Infectious Retinal and Choroidal Inflammation	203
Cytomegalovirus Infection	203
Necrotizing Herpetic Retinitis	205
Endogenous Bacterial Endophthalmitis	206
Fungal Endophthalmitis	207
Tuberculosis	209
Syphilitic Chorioretinitis	209
Cat-Scratch Disease	210
Toxoplasmic Chorioretinitis	211
Toxocariasis	213
Lyme Disease	214
Diffuse Unilateral Subacute Neuroretinitis	214
8 Congenital and Stationary Retinal Disease	217
Color Vision (Cone System) Abnormalities	217
Congenital Color Deficiency	217
Achromatopsia	217
Night Vision (Rod System) Abnormalities	219
Congenital Night-Blinding Disorders With Normal Fundi	219
Congenital Night-Blinding Disorders With Prominent Fundus Abnormality	220
9 Hereditary Retinal and Choroidal Dystrophies	225
Diagnostic and Prognostic Testing	226
Diffuse Photoreceptor Dystrophies	227
Retinitis Pigmentosa	228
Cone Dystrophies	236
Cone-Rod Dystrophies	237
Macular Dystrophies	238
Stargardt Disease	238
Vitelliform Degenerations	241
Familial (Dominant) Drusen	244
Pattern Dystrophies	245
Sorsby Macular Dystrophy	246
Choroidal Dystrophies	247
Diffuse Degenerations	247
Regional and Central Choroidal Dystrophies	249
Inner Retinal and Vitreoretinal Dystrophies	251
X-Linked Retinoschisis	251
Goldmann-Favre Syndrome	252
10 Retinal Degenerations Associated With Systemic Disease	255
Disorders Involving Other Organ Systems	257
Infantile-Onset to Early Childhood-Onset Syndromes	257
Bardet-Biedl Complex of Diseases	258
Hearing Loss and Pigmentary Retinopathy	259

Neuromuscular Disorders	260
Other Organ System Disorders	260
Paraneoplastic Retinopathy	262
Metabolic Diseases	263
Albinism	264
Central Nervous System Metabolic Abnormalities	265
Amino Acid Disorders	269
Mitochondrial Disorders	270
Systemic Drug Toxicity	271
Chloroquine Derivatives	271
Phenothiazines	273
Other Agents	274
11 Peripheral Retinal Abnormalities	277
Retinal Breaks	277
Traumatic Breaks	278
Posterior Vitreous Detachment	280
Examination and Management of PVD	282
Lesions Predisposing to Retinal Detachment	283
Lattice Degeneration	283
Vitreoretinal Tufts	284
Meridional Folds, Enclosed Ora Bays, and Peripheral Retinal Excavations	285
Lesions Not Predisposing to Retinal Detachment	286
Paving-stone, or Cobblestone, Degeneration	286
Retinal Pigment Epithelial Hyperplasia	288
Retinal Pigment Epithelial Hypertrophy	288
Peripheral Cystoid Degeneration	288
Prophylactic Treatment of Retinal Breaks	289
Symptomatic Retinal Breaks	290
Asymptomatic Retinal Breaks	290
Prophylaxis of Lattice Degeneration	291
Aphakia and Pseudophakia	291
Fellow Eye in Patient With Retinal Detachment	292
Subclinical Retinal Detachment	292
Retinal Detachment	292
Rhegmatogenous Retinal Detachment	294
Tractional Retinal Detachment	298
Exudative Retinal Detachment	298
Differential Diagnosis of Retinal Detachment	299
Retinoschisis	299
12 Diseases of the Vitreous	303
Normal Anatomy	303
Posterior Vitreous Detachment	303
Developmental Abnormalities	304
Tunica Vasculosa Lentis	304
Prepapillary Vascular Loops	304

Persistent Fetal Vasculature	306
Hereditary Hyaloideoretinopathies With Optically Empty Vitreous	308
Familial Exudative Vitreoretinopathy	309
Asteroid Hyalosis	310
Cholesterolosis	311
Amyloidosis	311
Spontaneous Vitreous Hemorrhage	313
Pigment Granules	313
Vitreous Abnormalities Secondary to Cataract Surgery	313

13 Posterior Segment Manifestations of Trauma 315

Evaluation of the Patient Following Ocular Trauma	315
Blunt Trauma	316
Vitreous Hemorrhage	317
Comotio Retinae	317
Choroidal Rupture	318
Posttraumatic Macular Hole	318
Retinitis Sclopetaria	319
Scleral Rupture	319
Lacerating and Penetrating Injuries	320
Perforating Injuries	323
Intraocular Foreign Bodies	323
Surgical Techniques for Removal of Intraocular Foreign Bodies	325
Retained Intraocular Foreign Bodies	325
Posttraumatic Endophthalmitis	327
Sympathetic Ophthalmia	327
Shaken Baby Syndrome/Nonaccidental Trauma	328
Avulsion of the Optic Disc	329
Photic Damage	330
Solar Retinopathy	331
Phototoxicity from Ophthalmic Instrumentation	331
Ambient Light	332
Occupational Light Toxicity	333

PART III Selected Therapeutic Topics 335

14 Laser Therapy for Posterior Segment Diseases 337

Basic Principles of Photocoagulation	337
Choice of Laser Wavelength	337
Practical Aspects of Laser Photocoagulation	340
Indications	341
Complications of Photocoagulation	342
Transpupillary Thermotherapy	344
Photodynamic Therapy	344
Complications of Photodynamic Therapy	346

15 Vitreoretinal Surgery	349
Pars Plana Vitrectomy	349
Vitrectomy for Selected Macular Diseases	349
Macular Epiretinal Membranes	349
Vitreomacular Traction Syndrome.	351
Idiopathic Macular Hole	351
Submacular Hemorrhage.	353
Subfoveal Choroidal Neovascularization	354
Vitrectomy for Posterior Segment Complications of Anterior	
Segment Surgery	355
Postoperative Endophthalmitis	355
Cystoid Macular Edema	358
Suprachoroidal Hemorrhage	359
Retinal Detachment	360
Needle Penetration of the Globe.	364
Retained Lens Fragments After Phacoemulsification	365
Posteriorly Dislocated Intraocular Lenses.	367
Vitrectomy for Complex Retinal Detachment.	368
Vitrectomy for Diabetic Tractional Retinal Detachment	369
Complications of Pars Plana Vitrectomy	369
Future Horizons in Vitreoretinal Surgery.	370
Basic Texts.	373
Related Academy Materials	375
Credit Reporting Form	379
Study Questions	383
Answers.	391
Index	395
