<b>1. Introduction</b>	<b>1</b>
1.1 What is habitat management and why is it necessary?	1
1.2 Principles of habitat management	5
1.3 The aims and scope of this book	8
1.4 Outline of the book	10
<b>2. Philosophical approaches to habitat management</b>	<b>13</b>
2.1 Preserving cultural habitats or managing change?	13
2.2 Recreating former cultural habitats or creating new ones?	16
2.3 The level of intervention: focusing on individual species or encouraging natural processes?	16
2.4 Integrating habitat management with other interests and values	22
2.5 Conclusions	22
<b>3. Setting objectives and monitoring</b>	<b>27</b>
3.1 Management planning	27
3.1.1 <i>The format of the management plan</i>	28
3.2 Monitoring and surveillance	44
3.2.1 <i>Recording management actions</i>	45
3.2.2 <i>Making the most of existing information</i>	45
3.2.3 <i>Reverse planning and deciding what level of evidence is required</i>	45
3.2.4 <i>Using indices and sampling</i>	47
3.2.5 <i>Use of controls</i>	49
3.2.6 <i>Frequency of monitoring</i>	50
3.2.7 <i>Maintaining consistency of methods</i>	50
3.2.8 <i>'Quick and dirty' site audits</i>	52
3.3 Achieving conservation objectives in the wider countryside: agri-environment schemes and conservation programmes	53
3.3.1 <i>Prescription-led</i>	53
3.3.2 <i>Outcome-led</i>	53
3.3.3 <i>Auctioning conservation contracts</i>	55

<b>4. General techniques and considerations</b>	<b>57</b>
4.1 Management for different taxa	57
4.1.1 <i>Plants</i>	57
4.1.2 <i>Fungi</i>	58
4.1.3 <i>Lichens</i>	59
4.1.4 <i>Vertebrates</i>	59
4.1.5 <i>Invertebrates</i>	60
4.2 Landscape factors	63
4.2.1 <i>Area of habitat</i>	64
4.2.2 <i>Connectivity</i>	64
4.2.3 <i>Edge effects</i>	67
4.2.4 <i>Surrounding habitats</i>	68
4.3 Disturbance	68
4.4 Grazing	69
4.4.1 <i>Levels of control over grazing</i>	69
4.4.2 <i>Breed type</i>	74
4.4.3 <i>Use of anti-parasitic drugs</i>	75
4.5 Controlling unwanted plants	77
4.6 Eradicating introduced cats and rats on islands	79
4.7 Taking account of climate change	82
4.7.1 <i>Impacts</i>	82
4.7.2 <i>Mitigation and compensation</i>	83
<b>5. Dry grasslands</b>	<b>87</b>
5.1 General principles of managing grasslands	88
5.1.1 <i>Effects of management on vegetation</i>	88
5.1.2 <i>Effects of management on fungi</i>	90
5.1.3 <i>Effects of management on the grassland fauna</i>	90
5.2 Non-intervention	92
5.3 Differences between grazing, cutting, and burning	94
5.3.1 <i>Sward composition and structure</i>	94
5.3.2 <i>Scrub</i>	96
5.3.3 <i>Soil nutrients</i>	96
5.3.4 <i>Dung and carrion</i>	97
5.4 Management by grazing	97
5.4.1 <i>Effects of different grazing animals</i>	97
5.4.2 <i>Using mixtures of grazing animals</i>	103
5.4.3 <i>Grazing pressure</i>	105
5.4.4 <i>Timing and duration of grazing</i>	109
5.5 Management by cutting with or without grazing	113
5.5.1 <i>Meadows, and silage and haylage fields</i>	113
5.5.2 <i>Other grasslands</i>	115
5.5.3 <i>Topping</i>	116

5.5.4	<i>Minimizing losses of birds' nests and chicks during cutting</i>	117
5.6	Managing by burning with or without grazing	117
5.7	Rotational management and the size of areas managed at any one time	120
5.8	Soil disturbance	121
5.9	Use of fertilizers, lime, slurry, and farmyard manure	124
5.10	Diversifying botanically dull grasslands	125
5.10.1	<i>Obtaining suitable seed</i>	128
5.10.2	<i>Oversowing and addition of green hay</i>	128
5.10.3	<i>Slot seeding</i>	129
5.10.4	<i>Planting young pot-grown plants or seedling plugs</i>	129
5.10.5	<i>Providing suitable aftercare</i>	129
<b>6.</b>	<b>Dwarf-shrub habitats and shrublands</b>	<b>131</b>
6.1	Key factors influencing the suitability of dwarf-shrub habitats for plants and animals	132
6.2	General principles of managing dwarf-shrub vegetation and shrublands	132
6.3	Burning	135
6.4	Grazing and browsing	140
6.5	European Atlantic lowland heathlands	141
6.5.1	<i>Key factors influencing the suitability of Atlantic lowland heathlands for plants and animals</i>	142
6.5.2	<i>Overview of management</i>	145
6.5.3	<i>Cutting and burning lowland heathland vegetation</i>	148
6.5.4	<i>Grazing and browsing</i>	152
6.5.5	<i>Removing individual trees and patches of scrub</i>	158
6.5.6	<i>Controlling bracken</i>	160
6.5.7	<i>Sod cutting/turf stripping to reduce nutrient levels and other methods of creating bare and disturbed ground</i>	160
6.6	Atlantic upland heaths and moorlands	164
6.6.1	<i>Overview of management</i>	166
6.6.2	<i>Burning and cutting</i>	167
6.6.3	<i>Grazing</i>	169
6.6.4	<i>Controlling bracken</i>	171
<b>7.</b>	<b>Forests, woodlands, and scrub</b>	<b>173</b>
7.1	Important features of forests and woodlands for wildlife	173
7.1.1	<i>Tree-species composition</i>	174
7.1.2	<i>Growth stage and structure of stands</i>	174
7.1.3	<i>Theory of woodland regeneration</i>	174

7.1.4	<i>Cyclical succession of woodland, scrub, and grassland mediated through grazing</i>	177
7.1.5	<i>Changes in biodiversity in relation to growth stage and structure</i>	179
7.1.6	<i>Quantities and types of dead wood</i>	180
7.1.7	<i>Presence of gaps, glades, forest edge, and associated habitats</i>	181
7.1.8	<i>Variation in soils, topography, and drainage</i>	182
7.2	Types of forest and woodland	182
7.2.1	<i>Old-growth</i>	183
7.2.2	<i>Recent secondary woodland and scrub</i>	185
7.2.3	<i>Managed high forest</i>	185
7.2.4	<i>Coppice</i>	185
7.2.5	<i>Managed open woodland systems</i>	186
7.3	Managing scrub	187
7.3.1	<i>Scrub removal</i>	189
7.3.2	<i>Diversifying the structure of closed-canopy scrub and preventing scrub from succeeding to woodland</i>	191
7.3.3	<i>Increasing the extent of scrub</i>	191
7.4	Managing woodlands and forests for conservation	191
7.4.1	<i>Enhancing formerly managed high forest and recent secondary woodland</i>	193
7.4.2	<i>Managing coppice woodland</i>	197
7.4.3	<i>Managing short-rotation coppice</i>	205
7.4.4	<i>Managing open woodland systems</i>	207
7.4.5	<i>Grazing and browsing</i>	209
7.4.6	<i>Burning</i>	211
7.4.7	<i>Integrating conservation management with commercial forestry</i>	215
<b>8.</b>	<b>Freshwater wetlands and water bodies</b>	<b>229</b>
8.1	Principles of manipulating water levels	230
8.2	Water quality	232
8.3	Large, deep water bodies	234
8.3.1	<i>Islands and rafts</i>	234
8.4	Large, shallow water bodies	237
8.4.1	<i>Increasing food supply for waterbirds: moist-soil management</i>	238
8.4.2	<i>Providing shallow-water, mud, and open marginal habitat</i>	241
8.5	Temporary pools	242
8.6	Permanent ponds and water-filled ditches	242
8.6.1	<i>Clearing out vegetation to set back succession</i>	244
8.6.2	<i>Re-profiling to provide suitable water depths</i>	246

8.6.3	<i>Management of marginal vegetation</i>	248
8.6.4	<i>Management of water levels</i>	249
8.6.5	<i>Creating new water bodies within existing networks of ditches</i>	249
8.7	Rivers	249
8.8	Swamps and fens	252
8.8.1	<i>Manipulating the annual water regime</i>	253
8.8.2	<i>Manipulating the proportions of open water and swamp using periodic drawdowns and year-to-year fluctuations in water levels</i>	254
8.8.3	<i>Preventing or reversing succession by long-term raising of water levels</i>	257
8.8.4	<i>Lowering the substrate to set back succession and provide open water</i>	257
8.8.5	<i>Long-term maintenance of open water</i>	262
8.8.6	<i>Vegetation management: differences between mowing, burning, grazing, and non-intervention</i>	262
8.9	Bogs	279
8.10	Wet scrub	281
8.11	Wet woodland	283
8.12	Wet grasslands	283
8.12.1	<i>Maintaining existing botanically rich swards</i>	288
8.12.2	<i>Providing suitable conditions for wintering wildfowl and other waterbirds</i>	289
8.12.3	<i>Providing suitable conditions for breeding waders/meadow birds</i>	290
<b>9.</b>	<b>Coastal habitats</b>	<b>301</b>
9.1	Sea cliffs	301
9.2	Intertidal mudflats, saltmarsh, and other tidal marsh vegetation	302
9.2.1	<i>Grazing</i>	305
9.2.2	<i>Burning</i>	309
9.2.3	<i>Reducing erosion and increasing sediment supply</i>	310
9.3	Management of intertidal habitat-creation sites	311
9.3.1	<i>Tidal regime</i>	311
9.3.2	<i>Re-introducing topographic variation</i>	313
9.4	Restoration of impounded saltmarsh	315
9.5	Saline water bodies	318
9.5.1	<i>Manipulating salinities</i>	321
9.5.2	<i>Manipulating water levels</i>	323
9.5.3	<i>Controlling marginal vegetation</i>	325
9.5.4	<i>Creating and managing islands</i>	325
9.6	Beaches and shingle	326
9.7	Dunes	327

9.7.1	<i>Grazing</i>	328
9.7.2	<i>Bare ground and erosion</i>	329
9.7.3	<i>Management of dune slacks</i>	330
<b>10.</b>	<b>Arable land</b>	<b>331</b>
10.1	Farming systems and crop types	334
10.1.1	<i>Low-input, mixed, and organic farming</i>	334
10.1.2	<i>Spring-sown crops and winter stubbles</i>	336
10.1.3	<i>Fallow, set-aside, and grassland creation</i>	338
10.1.4	<i>Undersowing cereal crops</i>	340
10.1.5	<i>Non-inversion tillage</i>	340
10.2	Minimizing pesticide and fertilizer use on field margins	341
10.3	Providing cultivated but unsown areas within fields	344
10.4	Minimizing destruction of birds' nests during mechanical operations	344
10.5	Providing unharvested crops for birds to eat	345
10.6	Manipulating flooding regimes	347
10.7	Uncropped habitats	349
10.7.1	<i>Hedgerows, shelterbelts, shrubby fencerows, and other scattered trees and scrub</i>	351
10.7.2	<i>Grassy field edges (grass margins/field borders, grass filter strips, and beetle banks)</i>	352
10.7.3	<i>Water-filled ditches/dykes</i>	353
10.7.4	<i>Nectar strips</i>	354
<b>11.</b>	<b>Gardens, backyards, and urban areas</b>	<b>355</b>
11.1	Managing urban areas, gardens, and backyards for wildlife	357
11.1.1	<i>Minimizing or avoiding harmful gardening practices</i>	360
11.1.2	<i>Planting flowers, shrubs, and trees that provide good wildlife habitat</i>	360
11.1.3	<i>Creating specific features for wildlife</i>	362
11.1.4	<i>Artificial nest and hibernation sites</i>	366
11.1.5	<i>Minimizing predation on wildlife by domestic cats</i>	368
11.2	Brownfield and mineral-extraction sites	369
	<i>References</i>	371
