

Contents

| | |
|---|-----------|
| Preface | ix |
| Chapter 1 Overview of the Cardiovascular System | 1 |
| Objectives / 1 | |
| Homeostatic Role of the Cardiovascular System / 1 | |
| The Basic Physics of Blood Flow / 5 | |
| The Heart / 8 | |
| The Vasculature / 13 | |
| Blood / 15 | |
| Foundation for Subsequent Chapters / 17 | |
| Key Concepts / 17 | |
| Study Questions / 18 | |
| Chapter 2 Characteristics of Cardiac Muscle Cells | 20 |
| Objectives / 20 | |
| Electrical Activity of Cardiac Muscle Cells / 21 | |
| Mechanical Activity of the Heart / 35 | |
| Relating Cardiac Muscle Cell Mechanics to Ventricular Function / 44 | |
| Key Concepts / 45 | |
| Study Questions / 46 | |
| Chapter 3 The Heart Pump | 48 |
| Objectives / 48 | |
| Cardiac Cycle / 49 | |
| Determinants of Cardiac Output / 55 | |
| Influences on Stroke Volume / 56 | |
| Summary of Determinants of Cardiac Output / 59 | |
| Cardiac Energetics / 63 | |
| Key Concepts / 65 | |
| Study Questions / 66 | |
| Chapter 4 Measurements of Cardiac Function | 67 |
| Objectives / 67 | |
| Measurement of Cardiac Output / 67 | |
| Cardiac Contractility Estimates / 68 | |
| Measurement of Cardiac Excitation—The Electrocardiogram / 70 | |
| Cardiac Dipoles and Electrocardiographic Records / 74 | |
| Mean Electrical Axis and Axis Deviations / 77 | |
| The Standard 12-Lead Electrocardiogram / 79 | |
| Key Concepts / 81 | |
| Study Questions / 81 | |

| | |
|---|------------|
| Chapter 5 Cardiac Abnormalities | 83 |
| Objectives / 83 | |
| Electrical Abnormalities and Arrhythmias / 83 | |
| Valvular Abnormalities / 88 | |
| Key Concepts / 91 | |
| Study Questions / 92 | |
| Chapter 6 The Peripheral Vascular System | 94 |
| Objectives / 94 | |
| Cardiovascular Transport / 96 | |
| Basic Vascular Function / 102 | |
| Measurement of Arterial Pressure / 111 | |
| Determinants of Arterial Pressure / 112 | |
| Key Concepts / 115 | |
| Study Questions / 116 | |
| Chapter 7 Vascular Control | 119 |
| Objectives / 119 | |
| Vascular Smooth Muscle / 120 | |
| Control of Arteriolar Tone / 125 | |
| Control of Venous Tone / 134 | |
| Summary of Primary Vascular Control Mechanisms / 134 | |
| Vascular Control of Coronary Blood Flow / 135 | |
| Vascular Control in Specific Organs / 138 | |
| Key Concepts / 146 | |
| Study Questions / 146 | |
| Chapter 8 Central Venous Pressure: An Indicator of Circulatory Hemodynamics | 148 |
| Objectives / 148 | |
| Interaction of System Components / 148 | |
| Central Venous Pressure: An Indicator of Circulatory Status / 151 | |
| Influence of Central Venous Pressure on Venous Return / 152 | |
| Influence of Peripheral Venous Pressure on Venous Return / 153 | |
| Determination of Cardiac Output and Venous Return by Central Venous Pressure / 154 | |
| Clinical Implications of Abnormal Central Venous Pressures / 159 | |
| Key Concepts / 160 | |
| Study Questions / 161 | |
| Chapter 9 Regulation of Arterial Pressure | 163 |
| Objectives / 163 | |
| Short-Term Regulation of Arterial Pressure / 164 | |
| Long-Term Regulation of Arterial Pressure / 174 | |

| | |
|--|------------|
| Key Concepts / 180 | |
| Study Questions / 181 | |
| Chapter 10 Cardiovascular Responses to Physiological Stresses | 183 |
| Objectives / 183 | |
| Effect of Respiratory Activity / 185 | |
| Effect of Gravity / 188 | |
| Effect of Exercise / 193 | |
| Normal Cardiovascular Adaptations / 197 | |
| Effect of Gender / 201 | |
| Key Concepts / 201 | |
| Study Questions / 202 | |
| Chapter 11 Cardiovascular Function in Pathological Situations | 204 |
| Objectives / 204 | |
| Circulatory Shock / 205 | |
| Cardiac Disturbances / 210 | |
| Hypertension / 217 | |
| Key Concepts / 221 | |
| Study Questions / 222 | |
| Answers to Study Questions | 224 |
| Appendix A | 239 |
| Appendix B | 240 |
| Appendix C | 241 |
| Appendix D | 243 |
| Appendix E | 246 |
| Index | 251 |
