

# CONTENTS

Contributors .....	ix
Preface .....	xxi

## PART I

### Clinical Evaluation of the Patient

1. Initial Approach to the Patient: History and Physical Examination..... 3  
*Marshall A. Lichtman and Linda J. Burns*
2. Examination of Blood Cells..... 11  
*Daniel H. Ryan*
3. Examination of The Marrow..... 27  
*Daniel H. Ryan*
4. Consultative Hematology..... 41  
*Rondeep S. Brar and Stanley L. Schrier*

## PART II

### The Organization of the Lymphohematopoietic Tissues

5. Structure of the Marrow and the Hematopoietic Microenvironment..... 53  
*Utpal P. Davé and Mark J. Koury*
6. The Organization and Structure of Lymphoid Tissues..... 85  
*Aharon G. Freud and Michael A. Caligiuri*

## PART III

### Epochal Hematology

7. Hematology of the Fetus and Newborn..... 99  
*James Palis and George B. Segel*
8. Hematology during Pregnancy..... 119  
*Martha P. Mims*
9. Hematology in Older Persons..... 129  
*William B. Ershler, Andrew S. Artz, and Bindu Kanapuru*

## PART IV

### Molecular and Cellular Hematology

10. Genetic Principles and Molecular Biology..... 145  
*Lynn B. Jorde*
11. Genomics..... 155  
*Lukas D. Wartman and Elaine R. Mardis*
12. Epigenetics..... 165  
*Bradley R. Cairns*
13. Cytogenetics and Genetic Abnormalities..... 173  
*Lucy A. Godley, Madina Sukhanova, Gordana Raca, and Michelle M. Le Beau*
14. Metabolism of Hematologic Neoplastic Cells..... 191  
*Zandra E. Walton, Annie L. Hsieh, and Chi V. Dang*
15. Apoptosis Mechanisms: Relevance to the Hematopoietic System..... 203  
*John C. Reed*

16. Cell-Cycle Regulation and Hematologic Disorders..... 213  
*Yun Dai, Prithviraj Bose, and Steven Grant*
17. Signal Transduction Pathways..... 247  
*Kenneth Kaushansky*
18. Hematopoietic Stem Cells, Progenitors, and Cytokines..... 257  
*Kenneth Kaushansky*
19. The Inflammatory Response..... 279  
*Jeffrey S. Warren and Peter A. Ward*
20. Innate Immunity..... 293  
*Bruce Beutler*
21. Dendritic Cells and Adaptive Immunity..... 307  
*Madhav Dhodapkar, Crystal L. Mackall, and Ralph M. Steinman*

## PART V

### Therapeutic Principles

22. Pharmacology and Toxicity of Antineoplastic Drugs..... 315  
*Benjamin Izar, Dustin Dzube, James M. Cleary, Constantine S. Mitsiades, Paul G. Richardson, Jeffrey A. Barnes, and Bruce A. Chabner*
23. Hematopoietic Cell Transplantation..... 353  
*Andrew R. Rezvani, Robert Lowsky, and Robert S. Negrin*
24. Treatment of Infections in The Immunocompromised Host..... 383  
*Lisa Beutler and Jennifer Babik*
25. Antithrombotic Therapy..... 393  
*Gregory C. Connolly and Charles W. Francis*
26. Immune Cell Therapy..... 409  
*Carolina Berger and Stanley R. Riddell*
27. Vaccine Therapy..... 421  
*Katayoun Rezvani and Jeffrey J. Mollndrem*
28. Therapeutic Apheresis: Indications, Efficacy, and Complications..... 427  
*Robert Weinstein*
29. Gene Therapy for Hematologic Diseases..... 437  
*Hua Fung and Stanton Gerson*
30. Regenerative Medicine: Multipotential Cell Therapy for Tissue Repair..... 447  
*Jakub Tolar, Mark J Osborn, Randy Daughters, Anannya Banga, and John Wagner*

## PART VI

### The Erythrocyte

31. Structure and Composition of the Erythrocyte..... 461  
*Narla Mohandas*
32. Erythropoiesis..... 479  
*Josef T. Prchal and Perumal Thiagarajan*
33. Erythrocyte Turnover..... 495  
*Perumal Thiagarajan and Josef Prchal*
34. Clinical Manifestations and Classification of Erythrocyte Disorders..... 503  
*Josef T. Prchal*
