

<b>Renin- Angiotensin- Aldosterone Agents</b>	<b>57</b>
Effect of ACEI and ARB	59
Adverse Reactions of ACEI and ARB	60
<b>Diuretics</b>	<b>63</b>
Mode of Action of Diuretics	63
Functional Segments of Tubular System	65
<b>Antiplatelets and Anticoagulants</b>	<b>72</b>
Components of the Blood	72
Coagulation Process	73
Fibrinolysis	75
Natural Anticoagulation	76
Anticoagulants	77
Unfractionated heparin	78
Heparin Induced Thrombocytopenia	78
Low molecule weight heparin (LMWH)	79
Direct thrombin inhibitors	81
Thrombolytics	82
Vitamin K Antagonists	84
Antiplatelets	87
<b>Nitrates and Vasodilators</b>	<b>99</b>
Nitrates	99

# Table of Contents

<b>Basics of Pharmacology</b>	<b>11</b>
Pharmacokinetics	11
CYP 450 System	17
Half-life	20
Pharmacodynamics	21
Food Drug Interaction	22
Adverse Drug Reactions	23
Drug Safety During Pregnancy	24
<b>Alpha Receptor Mediated Agents</b>	<b>29</b>
Alpha-1 Adrenergic Antagonists	30
Centrally Acting Alpha-2 Agonist	32
Nonselective Alpha Receptor Antagonist	34
<b>Beta Receptor Blockers</b>	<b>37</b>
Action of Beta Receptors	38
Major Side Effects of Beta blockers	42
Classification of Calcium Channel Blockers	47
<b>Calcium Channel Blockers</b>	<b>47</b>
Pharmacokinetics	48
Adverse Effects and Interactions	50

Sodium Nitroprusside (Nipride/Nitropress)	102
Nesiritide (Natrecor)	103
Direct Arterial Vasodilators	104
<b>Inotropes and Vasopressors</b>	<b>107</b>
Isoproterenol (Isuprel®)	110
Milrinone (Primacor®)	111
Dopamine	112
Dobutamine	112
<b>Lipid Lowering Agents</b>	<b>116</b>
Lipoproteins	116
Lipoprotein(a)	117
Dyslipidemia	119
Treatment of Hyperlipidemia	120
HMG-CoA Reductase Inhibitors (Statins)	121
Bile Acid Binding Resins	123
Niacin	124
Cholesterol Absorption Inhibitors	124
Fibric Acid Derivatives	125
Fish Oil	125
<b>Nicotine and Other Cardiac Toxins</b>	<b>130</b>
Nicotine	130
Nicotine Withdrawal	131

Treatment of Nicotine Addiction	132
Nicotine Replacement Therapy	132
Neurochemical Modulators	134
Cocaine	134
Amphetamine	136
Alcohol	137
Caffeine	138
Marijuana	138
Heroin	139
<b>Pulmonary Hypertension and Vascular Disorders</b>	<b>143</b>
Pulmonary Hypertension	143
Prostanoids	145
Endothelin Receptor Antagonists	146
PDE-5 Inhibitors	147
Peripheral Vascular Disease (PVD)	147
<b>Antiarrhythmics</b>	<b>150</b>
Classification of Antiarrhythmic Drugs	150
Class I Antiarrhythmic Drugs	151
Class 1A Antiarrhythmic Agents	152
Quinidine	153
Procainamide	154
Disopyramide (Norpace®)	154

<b>Lidocaine</b>	<b>155</b>
<b>Mexiletine</b>	<b>156</b>
<b>Class 1C Antiarrhythmic Agents</b>	<b>157</b>
<b>Flecainide (Tambacor®)</b>	<b>157</b>
<b>Propafenone (Rythmol®)</b>	<b>157</b>
<b>Class II Antiarrhythmics</b>	<b>158</b>
<b>Class III Antiarrhythmics</b>	<b>159</b>
<b>Amiodarone (Pacerone®)</b>	<b>160</b>
<b>Dronedarone (Multaq®)</b>	<b>161</b>
<b>Sotalol (Betapace®)</b>	<b>162</b>
<b>Ibutilide (Corvert®)</b>	<b>162</b>
<b>Dofetilide (Tikosyn®)</b>	<b>163</b>
<b>Class IV Antiarrhythmics</b>	<b>163</b>
<b>Class V Antiarrhythmics</b>	<b>166</b>
