

Contents

Preface.....	vii
Editor.....	xi
Contributors.....	xiii
1 Algorithms for Bioinformatics	1
<i>Bertil Schmidt</i>	
2 Introduction to GPGPUs and Massively Threaded Programming.....	29
<i>Robert M. Farber</i>	
3 FPGA: Architecture and Programming	49
<i>Douglas Maskell</i>	
4 Parallel Algorithms for Alignments on the Cell BE	59
<i>Abhinav Sarje and Srinivas Aluru</i>	
5 Orchestrating the Phylogenetic Likelihood Function on Emerging Parallel Architectures	85
<i>Alexandros Stamatakis</i>	
6 Parallel Bioinformatics Algorithms for CUDA-Enabled GPUs.....	117
<i>Yongchao Liu, Bertil Schmidt, and Douglas Maskell</i>	
7 CUDA Error Correction Method for High-Throughput Short- Read Sequencing Data.....	139
<i>Haixiang Shi, Weiguo Liu, and Bertil Schmidt</i>	
8 FPGA Acceleration of Seeded Similarity Searching	157
<i>Arpith C. Jacob, Joseph M. Lancaster, Jeremy D. Buhler, and Roger D. Chamberlain</i>	
9 Seed-Based Parallel Protein Sequence Comparison Combining Multithreading, GPU, and FPGA Technologies	181
<i>Dominique Lavenier and Van-Hoa Nguyen</i>	
10 Database Searching with Profile-Hidden Markov Models on Reconfigurable and Many-Core Architectures	203
<i>John Paul Walters, Vipin Chaudhary, and Bertil Schmidt</i>	

11	COPACOBANA: A Massively Parallel FPGA-Based Computer Architecture	223
	<i>Manfred Schimmler, Lars Wienbrandt, Tim Güneysu, and Jost Bissel</i>	
12	Accelerating String Set Matching for Bioinformatics Using FPGA Hardware	263
	<i>Yoginder S. Dandass</i>	
13	Reconfigurable Neural System and Its Application to Dimeric Protein Binding Site Identification	285
	<i>Feng Lin and Maria Stepanova</i>	
14	Parallel FPGA Search Engine for Protein Identification	313
	<i>Daniel Coca, Istvan Bogdan, and Robert J. Beynon</i>	
	Index	337
