Prefaceix
---------------	-----

PART I TEXT

Chapter 1 Neurohistology	3
Chapter 2 Gross Topography	24
Chapter 3 Spinal Cord	45
Chapter 4 Clinical Correlates of Spinal Cord Anatomy	70
Chapter 5 Medulla Oblongata	78
Chapter 6 Medulla Oblongata: Clinical Correlates	98
Chapter 7 Pons	103
Chapter 8 Pons: Clinical Correlates	123
Chapter 9 Mesencephalon (Midbrain)	129
Chapter 10 Mesencephalon (Midbrain): Clinical Correlates	150
Chapter 11 Diencephalon	155
Chapter 12 Diencephalon: Clinical Correlates	172
Chapter 13 The Basal Ganglia	180
Chapter 14 Basal Ganglia: Clinical Correlates	195
Chapter 15 Cerebellum	200
Chapter 16 Cerebellum: Clinical Correlates	223
Chapter 17 Cerebral Cortex	228
Chapter 18 Cerebral Cortex: Clinical Correlates	258
Chapter 19 Hypothalamus	268
Chapter 20 Hypothalamus: Clinical Correlates	276
Chapter 21 Limbic System	280
Chapter 22 Limbic System: Clinical Correlates	297
Chapter 23 Special Senses	304
Chapter 24 Special Senses: Clinical Correlates	323
Chapter 25 Central Nervous System Development	326
Chapter 26 Central Nervous System Development: Clinical Correlates	337
Chapter 27 Cerebral Circulation	348
Chapter 28 Cerebral Vascular Syndromes	359
Chapter 29 Cerebrospinal Fluid and the Barrier System	368
Chapter 30 Cerebrospinal Fluid and the Barrier System: Clinical Correlates	379
Chapter 31 Major Sensory and Motor Pathways	389
Chapter 32 Reticular Formation, Wakefulness, and Sleep	398

Chapter 33 Reticular Formation, Wakefulness, and Sleep: Clinical Correlates	407
Chapter 34 Control of Posture and Movement	411
Chapter 35 Approach to a Patient with a Neurologic Disorder	421

PART II ATLAS

Section 1 Sectional Anatomy	431
Section 2 Sagittal Yakovlev	435
Section 3 Axial Yakovlev	440
Section 4 Coronal Yakovlev	447
Section 5 Brain Stem	453
Section 6 Spinal Cord	463
Section 7 Sagittal MRI	467
Section 8 Axial MRI	470
Section 9 Coronal MRI	474
Bibliography	479
Index	481
